Japanese Traditional Crafts —Indigo dyeing— Japan Blue

Foreigners who came to Japan in the Meiji era were fascinated by the appearance of the blue town. British scientists fascinated by this indigo are said to have named this color Japan Blue. Indigo is a living thing, it changes color with one method of raising and dyeing. This rich "Japan blue", it is the sensitivity of Japanese people to enjoy the subtle difference.

horse chestnut
(Dinning table)

indigo dyeing is a dye that uses indigo pigment contained in plants. It was also the color that warriors of Sengoku Samurai liked and went to war with in the past. We tried indigo dyeing which is usually a dyeing method of cloth as a coating of wood plate. And this is an excellent article pursuing the ultimate Japanese beauty.

Japanese Traditional Crafts —piano painting ,plant dyeing —

Castor aralia (plant dyeing)

Hop hornbeam (piano painting)

Horse chestnut (piano painting with gradation)

It is the highest rank of woodworking paint finished by craftsmen who knew about mirror finish painting, and the piano painting which processes with excellent technique is finished like real mirrors.

Various of wood plate of 100 wood species, 6,000 pcs

We manage each sticker with a barcode attached one by one.

Lumber ⇒ arrival ⇒ inspection ⇒ photography ⇒ natural drying process is all carried out inside the company.

We have all the stock information on the net so that everyone can see it.

Processing

Adjust dimensions

We will make final arrangements of dimensions determined by customer's request. We will also make detailed arrangements on how to crack etc.

Process with planer

Craftsmen with good skill carefully look at each and finish it. We will correct the warp which is easy to put on a solid board and adjust the thickness as well.

Process with sander

The craftsman finishes the surface up to the stage before painting. There is no roughness even when touching by hand.

Repair of cracks

Craftsmen repair all small cracks by hand.

Painting

Craftsmen repeat painting and scraping by 4 to 5 steps by hand in both oil finishing and urethane painting.

Completion

It is completed with the legs attached. Iron legs, wooden legs and various types are available.
